ETRANS-2018, International Specialized Exhibition

Minsk (Belarus) will host a significant event in the field of electric transport on **October 2 through to October 4, 2018: ETRANS-2018, International Specialized Exhibition.**

The **ETRANS-2018** exhibition is an accessible platform to discuss initiatives for developing and investing in transportation means of the new generation, for sharing practices and technologies, and concluding contracts.

The purpose of the **ETRANS-2018** exhibition is to popularize the idea of an environmentally friendly and economical transportation, to define the development trends of the market for electric vehicles and their infrastructure.

The exhibition will present the leading distributors and manufacturers of environmentally friendly and innovative transportation means, including personal and urban electric transport, infrastructure equipment (batteries, chargers, and service stations equipment), intelligent transport technologies, and electronics.
